

# DAZL raises standards

## The facts speak for themselves

The Playing for Success programme transforms children's lives. We've always known that at the Delaware Adventure Zone for Learning (DAZL). We see it every day. Now, we have the hard proof.

## The stats

- 90% met national expectation for progress in reading, writing & maths
- 32% exceeded national expectation

NB: these were previously underachieving pupils. Source: data taken from 62 children who attended 3 PFS centres, spring 2007.

## DAZL builds confidence

Children at DAZL develop self-belief. They're inspired to discover more, about themselves and the world around them. Challenging activities such as abseiling, raft-building, archery, and moorland treks are followed by related academic work with impressive results. Adventure + learning = success.

## Children Love Learning at DAZL

Children come to us lacking confidence, restless at school, far from realizing their true potential. They leave DAZL rejuvenated and newly instilled with self-belief. We have a book full of comments from parents who've seen dramatic positive changes, and pupils who've relished every moment with us.

DAZL is free and it works

## A message from Pat Brunskill

'As a former head teacher, I know the last thing you want is yet more paperwork. So we've tried to keep it easy for you.'

'We provide all posters, promotional materials, forms, contact numbers etc. All you need to do is identify children who could benefit from the opportunities we offer & encourage parents to let them come. (We've got a leaflet for the mums and dads too: just ask if you need some.)'

Pat at Machu Picchu, Inca Trail. PFS Fundraising expedition, 2008

'DAZL really does change children's lives. Best of all, it's completely free.'
